

Pool Water Temperature Test with Heatsavr™

- This study was conducted by the Professional Pool Operators of America, and featured in Pump Room Press, No. 25 (11.02)
- During the test period there was a 92° Fahrenheit (F) average daily air temperature, and a 55° F average nightly air temperature.
- Without a pool cover, a 12° F overnight loss of water temperature was recorded. Using Heatsavr, only a 5° F overnight loss of water temperature was recorded.
